

## EDITORIAL

ECTI-CIT is an international Transaction that organized by an editor team assigned by ECTI Association. It focuses on research & development contributions related to computer and information technology. The aim of the transactions is to collect new knowledge in the fields, and be an opportunity for researchers in computer and information technology to report their own works and discuss at each other. We plan to issue ECTI-CIT Transactions twice a year, in May and November.

The first issue of ECTI-CIT Transactions is launched in May 2005. Though this is the new transactions, we assign international-level reviewers in each field to review all submitted papers in order to keep the paper quality. In the first issue, besides regular paper section, we also organize a special section on papers selected from ISCIT2004 held in Sapporo Japan in October 2004. There are 6 qualified papers are accepted to publish in this issue.

In the next issues, we try to organize not only special sections on papers selected from conferences such as ISCIT, ECTI-CON, NCSEC, and so on, but also special sections in specific research fields in order to close up the hot issues.

Finally, on behalf of ECTI-CIT Transactions editor team, I would like to express my sincere thanks to all authors, reviewers, and editorial board for great contributions on this first issue. Hopefully, your cooperation and contributions for ECTI-CIT Transactions will be continuously maintained, and forever make the ECTI-CIT Transactions as a vigorous stage for active researchers around the world.

Prof. Chidchanok Lursinsap  
Editor of ECTI-CIT Transactions
